

Alta Bioscience

A University of Birmingham business

*While the science may be challenging, our vision is simple:
To support research and discovery in academia and industry.*

Peptide synthesis

Custom polyclonal antibodies

Protein sequencing

Amino acid analysis

DNA oligo synthesis

MALDI mass spectrometry

Alta Bioscience is recognised world-wide as a leading manufacturing laboratory providing analysis and synthesis of DNA, proteins and other biochemical molecules to researchers in academia, pharmaceuticals and the food industry.

The laboratory has operated since 1973, is ISO accredited and based at the University of Birmingham, England.
