

# Because quality is no coincidence...

## GENERIC PEPTIDES

The PolyPeptide Group's generics portfolio is constantly expanding and includes well-known peptides such as Calcitonin, Desmopressin, Leuprolide and Octreotide as well as newly off-patent peptides like Eptifibatid, Bivalirudin and hPTH (1-34).

## EXPERIENCE

With more than 50 years experience, we are committed to the highest quality of peptide manufacturing and offer unparalleled expertise in proprietary and generic GMP-grade synthetic peptide manufacturing.

## CONFIDENCE

We explicitly commit to long-term continuous supply and cost-competitiveness of high quality peptide API manufacturing, up to very high volumes.

## DOCUMENTATION

With a long history of cGMP compliant manufacture and 20 approved drug substances, our services include support for all regulatory and approval processes. We provide full GMP documentation for all our generic products.

**With the experience and expertise of the PolyPeptide Group in generic peptides, nothing is left to chance.**
