

Because quality is no coincidence...

EXPERIENCE

With more than 50 years experience of pharmaceutical grade peptides, a long history of cGMP compliant manufacture, and over 20 approved generic and proprietary drug substances, our facilities conform to FDA regulations as well as those of other national regulatory authorities. Our services include support for all regulatory and approval processes.

LOCATION

With the security of 6 manufacturing sites across 3 continents, we are able to meet your requirements wherever you are and at whatever scale or stage of your pharmaceutical development.

QUALITY

From conception through to commercialization of your peptide, special attention is paid to quality. This includes diligent analytical development at the earliest stages of the campaign and continuous technical support throughout the entire project. Unparalleled security and long-term perspectives are the basis for a solid partnership.

With the experience and expertise of the PolyPeptide Group, nothing is left to chance.
